## HASH SCHEDULE

Alternating Saturday Hashes begin at 1600 Hours (4:00 p.m.) during Daylight Savings Time, and at 1500 Hours (3:00 p.m.) during Standard Time.

Third-Thursday-of-the-month Hyper Hashes begin at 1900 Hours (7:00 p.m.) during Daylight Savings Time, and at 1830 Hours (6:30 p.m.) during Standard Time.

Mismanagement may alter the scheduled time of a given Hash and/or schedule additional Hashes at its discretion.

Hashes are run without regard to the weather. However, Mismanagement reserves the right to cancel, delay, or reschedule a given Hash due to extraordinarily adverse conditions as defined by Mismanagement's good judgment. *"Neither snow nor rain nor cold nor heat nor gloom of night stays these Hashers from the swift completion of their appointed rounds."*

## PRIMARY HARE GUIDELINES

- \* KISS (Keep It Simple, Stupid).
- \* Use common sense (duh).
- \* The Hares are responsible for their Hash. (No matter what happens, it's the Hares' f--ing fault.)

## HASH CASH

### Expense-Related Information

Per Hasher (other than Virgins, who are gratis):

Hash Cash: **\$7.00**. To Hares: **\$1.00**. Skim: **\$1.50**. Available at the Hash: **\$4.50**.

Hares do not pay Hash Cash for their own Hash.

The Hash Fund (skim) will continue to accumulate to support Dabberhashery and Special Events (e.g. cost overruns beyond money collected for accommodations, extra beverages, and a band at, say, a Red Dress Hash).

Well in advance of the planned event date, Hares will present plans and budgets for any Special Event to Mismanagement for consideration. The Hash Fund (skim) will contribute to the "extra" cost of Special Events *only* with Mismanagement's prior approval.

The Hares will absorb Hares' expenses above and beyond the reimbursed \$1.00-per-Hasher. See above regarding extra expenditures for Special Events. (For more details regarding Hare Expenses, see HARE RESPONSIBILITIES, below.)

If the On-In / On-After is at a Hare's residence or other private venue (e.g. outdoors) and the Hare(s) provide(s) libations, et alia, for the Hash, Hare(s) will be entitled to the normal reimbursement of \$1.00 per Hasher plus Available Hash Cash up to the amount of their expenses (keep your receipts!).

Hares may voluntarily "donate" back to the Available Hash Cash all or some portion of their reimbursement.

When the run's Available Hash Cash is depleted, additional Apres/Circle Beer is provided at individual Hashers' expense and/or via voluntary collection. If there is excess Available Hash Cash, it will revert to the Hash Slush Fund (skim).

The Hash does not nor are the Hares expected to pay for Prelewd (before-the-Hash) beverages/refreshments/snacks. So-motivated Hashers provide such beverages/refreshments/snacks on a strictly voluntary basis.

## HARE RESPONSIBILITIES

(besides planning and laying a shitty trail)

### General Information

Hares coordinate with Hash Cash and the Beermeisters to buy and procure using the Available Hash Cash Circle/Apres beer, water, etc. (regardless of the Circle/Apres venue - outdoors, private residence, pub, wherever). The Beermeister should be employed for assistance in obtaining and decanting the beverages in preparation for the Circle. Note that WATER is equally as optional as BEER at the Circle/Apres.

When the Circle/Apres or BN is at a public establishment:

\* Hares are to make arrangements well in advance of Hash Day with the proprietor, manager, and/or other responsible party so that the establishment can be prepared for (is not surprised by) our arrival and has as complete a comprehension as possible of (is not surprised by) our antics and consumption habits.

\* Hares should always endeavor to negotiate a happy-hour / discounted price for the beer (the less expensive the beer, the more there is to drink). Establishments that do not serve draught beer by the pitcher are to be eschewed (read: avoided like the plague).

For both the BN and the Circle/Apres, it is better to over-provide than to under-provide. That is, when in doubt as to the quantity of beer that will be needed, Hares should overestimate - beer never goes to waste at the Hash.

Hares buy and procure at their own expense BN Beer, water, cups, ice, etc. (regardless of BN venue - outdoors, private residence, pub, wherever). Note that WATER is equally as optional as BEER at the BN.

When the BN is at a public establishment, the Hares must make arrangements to pay for the beer - either pre-pay, or send cash with a responsible Hound (i.e. one who will arrive at the BN with the pack).

Hares buy and procure at their own expense trail-laying materials (flour, coloring, sawdust, TP, chalk, drywall, post-it notes, etc.), including extra chalk or drywall for the pack to use to lay pack arrows. [The Hash will provide drywall and sawdust as long as the supply remains sufficient.]

Hares buy and procure at their own expense any treats (e.g. M&Ms, chips & salsa, pork rinds, whatever) and/or prizes they wish to provide.

The Hash does not nor are the Hares expected to pay for Prelewd (before-the-Hash) beverages/refreshments/snacks. So-motivated Hashers provide such beverages/refreshments/snacks on a strictly voluntary basis.

## ADDITIONAL HARE CONSIDERATIONS

(in no particular order)

Hares will provide to the On-Sec the Hash venue and erections at least two (2) weeks in advance of the Hash date for posting on the web site.

*Hint from the annoyed few who plan aHEAD: While we realize that there are sometimes extenuating circumstances, Hares are to strive to determine their starting venue AND post erections to same at least the stated two (2) weeks in advance. Timely dissemination of this information allows others, particularly potential newcummers and/or visitors, to plan to attend the Hash. (Remember, all you need is a starting venue in order to provide erections... you can wait until two days before your Hash to plan your trail (if you want to).)*

Erections are to provide enough detail that even a half-mind can understand/follow them. Minimally, include

- \* the interstate exit number,
- \* surface street navigation,
- \* a street address or intersection, and
- \* a Hare's cell phone number, if that will be available at the start.

Erections should also include the name, address, and phone number of the Apres venue (unless the Hares want/need to keep this information concealed until the End of Trail).

*Hint from annoyed lost souls: Double-check the accuracy of your erections! Verify left turns, right turns, north, south, east, west, route numbers, street names, distances, landmarks, etc.... it's advisable to at least once drive the erections you plan to send to the On-Sec before doing so. It's unlikely that everyone who is cumming knows YOUR neighborhood!*

When it is prudent/necessary to have a flashlight on trail, the Hares are to so advise via the erections.

~~The following requirement was suspended October 2007, and will remain so given continued absence of "powder calls" or other complaints: The Hamilton County Terrorism Early Warning Group ([john.mercado@cincinnati-oh.gov](mailto:john.mercado@cincinnati-oh.gov)) is to be notified of every Hash's venue at least two (2) days prior to the run; Anal Vice is responsible for contacting the HCTEWG. Such notification is to include any "sensitive areas" that will be Hashed. The venue is readily apparent from the web posting; but if potential "sensitive areas" are not intuitively obvious to the most half-minded observer, Hares are to contact Anal Vice with such information. AV will not rat where trail is going.~~

A → B Trails:

- \* When B is not within walking distance from A, Hares are to assure that one (or more) B vehicle(s) is(are) provided and present at B when the Hounds arrive (especially if B bags are to be transported - which is critical in cold or inclement weather!) *Unless there are extenuating circumstances, shuttles to A to obtain Hounds' vehicles should wait until after the Circle.*
- \* Hares will provide erections to B for use by Lost Souls. Such erections/maps should be left in a conspicuous location (such as on a Hare Vehicle's windshield) at A. If B erections are not left at A, the trail is presumed to be A → A.

Walkers' maps. Hares should provide a "walkers' map" or other instructions to the extent that trail will not be easily navigable for injured Hashers, pregnant Hashers, Hasher-wannabes who are trying to run, and the ilk. Hares may provide a more general walkers' map at their own discretion.

BN clean-up. When the BN has been stashed outdoors, Hares are responsible for retrieving / cleaning-up / disposing of the remains. Hashers do not litter!

A Virgin Hare is to have Adult Supervision. There must be at least one (1) experienced Hare on every trail.

TRESPASSING: NO TRAIL ON PRIVATE PROPERTY WITHOUT THE LANDOWNER'S PERMISSION. (See "Hare Arrow Crossing Private Property", below.)

GOLF COURSES are to be avoided. This applies not only during "normal" golfing season, but whenever there is any chance that golfers, groundskeepers, or other golf-course-related individuals will be out and about.

Hazardous, potentially injurious obstacles (e.g. low fences, barbed wire) are to be clearly marked with TP, caution tape, an abundance of flour - anything that will be easily recognized by running half-minds.

A Turkey/Eagle Split (see Hash Marks) should be employed especially when True Trail approaches, equals, or exceeds five (5) miles, give or take. Use good judgment based on total trail difficulty, terrain, time to traverse, weather, neighborhood, etc.

Hares are normally afforded a ten (10) minute HEAD start before the Hounds give chase.

## TRAIL MARKS

### Standard Sin City Trail Marks

**HASH** A Hash-Mix ★ blob, piece of TP, a piece of colored tape, a mark made with chalk (see below), a post-it note, etc., etc. - as explained in Chalk Talk - is a Hash Mark. Four (4) Hash Marks = ON-ON (True Trail), unless a YBF or BC is encountered, as described later.

★ Because of 911 "powder calls" that have been received by Hamilton County emergency responders, **flour alone**, especially plain white flour, is **NOT acceptable** for laying trail, especially in Hamilton County. However, SCH4 Hares are to follow these guidelines where ever they lay trail in the Greater Sin City Area, regardless of county or state.

Hash-Mix. As of this writing, the mix that has been recognized as acceptable by The Hamilton County Terrorism Early Warning Group and that still meets our needs regarding weight, economy, ease of distribution, cohesiveness, visibility, and environmental friendliness is **tinted (orange) flour PLUS coarse sawdust PLUS colored paper confetti**. A mix ratio of approximately **74:24:2** (respectively) keeps the mix from appearing too "powdery" while retaining the other necessary characteristics.

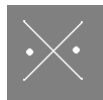

Hash-Mix is for use on public streets, sidewalks, trails, paths, in woods, etc., but **not in "sensitive areas"**, see Chalked Hash Mark, following:

Chalked Hash Mark. Hares are to use only chalk when traversing "sensitive areas" such as school/university campuses, near government buildings of any kind, near public buildings of concern (museums, stadiums, shopping centers, etc.), and large public gatherings (such as Oktoberfest). If the "sensitivity" of an area is questionable, a half-mind must always choose "sensitive".

Check or Decision Point. Trail can leave the Check in any direction except the one whence it came. Generally, four (4) Hash Marks off a Check indicate True Trail.

Boob Check. Female Hashers must find True Trail or show boobs to allow male Hashers to check. (If this Mark is abused by the Hare(s) for the purpose of gaining time on the pack, the Grand Master, Hash Tyrant, or other Senior Member of Mismanagement will declare that all Hashers have boobs.)

"Super" Check (or "Super" Boob Check). ONE (1) Hash Mark off a "Super" Check indicates True Trail.

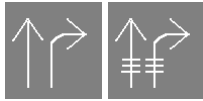

Blow Job / You've Been Fucked / False Trail. Hounds must return to the most recent Check and seek trail in a different direction. (A "backward" Hare Arrow (below) is also acceptable for this purpose, though it is not a common Sin City mark and, if used, should be explained in Chalk Talk.)

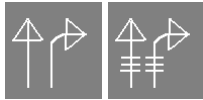

Back Check. True Trail, indicated by one Hash mark, will be found branching (generally at 90 degrees) someplace between the BC and the most recent Check.

As above, but look for trail branch x Hash Marks back from this mark - e.g. BC5 indicates that the trail branch will be found adjacent to the fifth Hash mark back.

Hare Arrow, laid only by a Hare. A Hare Arrow never lies, True Trail follows the arrow. (A "backward" Hare Arrow, i.e. one pointing at you, can also mean YBF, as above. In any case, follow the arrow, it does not lie.)

Hare Arrow crossing Private Property. True Trail enters private property which the Hares have obtained PERMISSION to cross. Hares are to explain during chalk talk that Private Property will be crossed. Hounds are not to stray from trail and should employ their best Hashing manners. End of Private Property, if not obvious, is to be designated by a "regular" Hare Arrow or the next Check.

Pack Arrow, laid only by Hounds. The Hounds think the trail went the direction indicated by this arrow... maybe the Hounds are right, maybe not.

Beer Near. Much rejoicing. A trail will have at least one (1) BN, and desirably more, unless trail is Hyper (discussed later). A BN functions as a Check unless otherwise described by the Hare(s) in Chalk Talk.

Turkey/Eagle Split. Indicates dual true trails, where the Eagle trail is more difficult or longer (or both) than the Turkey trail. "Turkeys flock, Eagles soar."

ReGroup. The entire pack is to gather at this point before proceeding on trail. This mark is to be used sparingly, only when there is a legitimate reason for the pack to be together - e.g. difficult trail or dangerous conditions - which should be explained at Chalk Talk. (Otherwise, it's just a chicken-shit attempt by the Hare(s) to delay the pack, and can be overridden by the Grand Master, Hash Tyrant, or other Senior Mismanagement Member.) Alternatively, consider using...

**BE VERY CAREFUL! BE VERY FUCKING CAREFUL!** A difficult or dangerous area of trail is about to be encountered, and Harriers should employ extreme (or extreme fucking) caution. The pack is to be warned during chalk talk to watch for this marking. *If a Hasher should not attempt to negotiate this area of trail alone*, employ the above RG with the BVC or BVFC.

On-In. Again, much rejoicing. End of Trail.

Special marks (e.g. SC for Swing Check, PO for Photo Op, PC for Photo Check or Playground Check, F for False Trail) can be used as long as the Hares introduce such marks during Chalk Talk.

To explain the Hash Marks and materials that will be used, Hares will present Chalk Talk prior to the run. Chalk Talk can be omitted only if there are no Virgins and no Visitors present, and only Standard Sin City Trail Marks will be used. If there is any doubt, explain the Hash Marks.

## HYPER HASHES

Hash Cash: **\$7.00**. Skim: **\$2.00**. Available at the Hash: **\$5.00**.

If there is excess Available Hash Cash, it will revert to the Hash Slush Fund (skim).

The Hyper Whore does not pay Hash Cash for Hyper Hashes.

A Hyper (or Pick-up) Hash is a Hash at which the Hare is chosen just before the run is about to begin. Such a Hare is selected as randomly as possible (usually by drawing from the Holy Hash Bucket a number that will correspond with a Hasher's number on the sign-in sheet) from all non-Virgin Hashers in attendance.

Hyper Hares use only standard Sin City Trail Marks (see above). For the benefit of Visitors, Virgins, and those with short memories / suicidal brain cells, these marks will be explained prior to Hare selection. The Hyper Whore, another Member of Sin City Mismanagement, or another "experienced" Sin City Hasher is responsible for Chalk Talk.

Upon selection, the Hyper Hare is presented the Holy Hash Bag (or Holy Hash Stick), which contains fiveish (5ish) pounds of Hash-Mix and a couple pieces of chalk (and some TP, where it appears that there is potential for utilization of same) with which to lay trail.

From presentation of the Holy Hash Bag/Stick, the Hyper Hare has a five (5) minute HEAD start before the Hounds give chase. When a Hyper Hare is snared, the snaring Hasher becomes the new Hare, and is given a three (3) minute HEAD start from the moment of the snare before the pack (or whatever portion of the pack has reassembled by that point) gives chase anew.

Hyper Hares are expected to lay frequent trail marks. A "clever" (but not "impossible to find") trail is certainly desirable and should be any Hare's goal, but the idea behind a Hyper Hash is that the original Hare (and subsequent Hare(s)) will be snared. This presents a prospect for multiple chases and multiple snares, allowing several Hashers an opportunity to Hare. Remember, 1) Absence of marks (i.e. infrequent marks) does not constitute "clever" trail, and B) "it's okay to get snared!"

When a Hyper Hare begins to run low on Hash-Mix, he/she should HEAD toward the Hash's starting venue. Hyper Hashes are generally expected to be A-to-A. If the Hare exhausts trail laying materials before getting back to the start, he/she should stop and wait for the pack to catch-up, rather than abandon the pack sans trail. It is expected that someone in the pack will have chalk so that arrows can be left for the benefit of stragglers and lost souls.

BN: Given their unplanned nature, a Hyper trail is not expected to include a Beer Near (BN). However, an industrious Hasher is certainly not discouraged from attempting to become a Hare and then lead the pack to a pre-planted cooler of Nectar, or arming him/herself with cash and randomly selecting a Local Establishment as the host of such a sacred event. Any such impromptu BN is at the expense of the Hasher who provides it.

PARTNER HARES: *This option has been made available in consideration of Hasher safety.* At the time of the selection of the initial Hyper Hare, the selected Hare has the option to pick a Partner Hare. Partner Hares must remain together, always within eyeshot, if not earshot, of one another. In the event of a Hare snare, there are two options: 1) the new Hare selects one of the Partner Hares to continue running with him/her, or B) the new Hare opts to Hare solo, and begins setting trail on his/her own. (Given extraordinary circumstances, so that no Hasher is left alone in undesirable surroundings, both former Partner Hares could run with the new Hare.) All other guidelines that apply to a single Hyper Hare also apply to Partner Hares.

## MISCELLANEOUS FAQs

(in no particular order)

### May I bring my pet to the Hash?

You can always bring your pocket mouse. But if you're talking about your dog, we do not encourage the practice, nor do we proscribe it.

Remember, if you have a dog on trail, you are totally responsible for the animal. If it needs water, you're responsible for providing the water; if trail goes over a six-foot barbed-wire fence, you're responsible for getting the critter up-over-and-down; if it takes a shit, you're responsible for moving the shit to a place where no Hasher (nor any "regular" pedestrian) will step in it.

You are also responsible for making sure that neither the dog nor its leash get underfoot or entangled in the legs of running Hashers. And, if the On-In or On-After is at a venue where pets are not allowed (e.g. in a barroom), you're responsible for finding a safe (non-injurious to the animal or to passers-by) place to stash the animal while we're inside.

*Hint: Check with the Hares to find out if the trail and/or On-In/After will be animal-friendly before you bring your pet.*

### May I bring my kid to the Hash?

If your kid is 18 or older, sure. If your kid is younger than 18 and of sufficient stature and fitness to be able to safely (or as safely as any other Hasher) negotiate trail, then use your good judgment, remembering that, as with a pet, you are totally responsible for your offspring unit's well-being and behavior.

We discourage under-21s from participating in the Circle because of the "bawdy" content and alcohol consumption. Additionally, under-21s may not be permitted into some of the venues (barrooms) that we visit.

Finally, we do not feel that young, impressionable children should be on trail, nor should they be present at the Circle. The Hash is not their place, and SCH4 will not and cannot be accountable for either their safety or their cultivation.

### I'm a walker - can I walk trail?

Yes, certainly. Walkers are welcome; however, remember that we are "A Drinking Club with a Running Problem", so special accommodations (maps, special instructions) for walkers are not required / not always provided.

Hares will provide a "walkers' map" or other instructions to the extent that trail will not be easily navigable for injured Hashers, pregnant Hashers, Hashers who are trying to run, etc. Hares may provide a more general walkers' map at their own discretion.

Our experience is that walkers (not those who mosey, not lollygaggers) have no problem following trail, even staying with / keeping up with the pack, hence WALKERS ARE NOT TO LEAVE THE START BEFORE THE RUNNERS! However, if you do fall behind the pack, know that pack arrows may or may not be present (or, if present, may not be correct) at each decision point, so you are expected to know how to find trail. It is also advisable to carry your cell phone and have a contact at trail's end. Beyond that, if you're out for an afternoon mosey, do so at your own risk.

### I couldn't make it to the run, but came to the On-After and paid Hash Cash. Why didn't I get credit for the Hash?

We are certainly delighted to see your smilin' puss at the On-After, but in order to be "counted" as having run the Hash, one must either do (run or walk) trail or contribute to trail. For example, an injured Hasher might agree to tend to the BN and the associated clean-up, or otherwise assist the Hares - that individual would be counted as having "done trail" and therefore get credit for the Hash.

Btw, if you do show just at the On-After - yes, you are expected to pay Hash Cash if you want to drink Hash beer.

### What kind of give-aways can I expect for my significant Anniversaries?

You mean besides a down-down and a hearty slap on the back?? Well, it's not like we're *required* to give your sorry arse anything, but...

- #2 SCH4 whistle (Blow Me).
- #10 SCH4 large or small (depending on what's in stock) plastic beer mug.
- #25 SCH4 lanyard.
- #50 SCH4 lined (for skunky Hash clothes) tote bag.
- #69 SCH4 baseball cap.
- #100 SCH4 engraved (personalized) pewter beer mug.
- #200 SCH4 embroidered (personalized) jacket.
- #300 SCH4 embroidered (personalized) gear bag.
- #400 SCH4 personalized lawn/deck chair.
- #500 Hardy congratulations, a slap on the back, and a down-down!
- #1000 On-trail wheelchair ride.

## OPERATING PHILOSOPHY

### The Mother Hash's Rules:

1. There are no rules of Hashing.
2. See Rule Number 1.

### SCH4's Rules:

1. There are no rules of Hashing.
2. See Rule Number 1.

That being said, each Hashing Kennel is unique, and, with influence from its Mismanagement and Membership, evolves and matures into a (mal)functioning unit with its own philosophy and purpose. So, with 11+ years of self-abuse now under our collective belt, and the hairy palms to show for it, where do we Sin City Hash House Harriers & Harriettes stand?

SCH4 is a running Hash - after all, we are "A Drinking Club with a Running Problem", not "A Drinking Club with an Exercise Option" - and definitely not just "A Drinking Club". Our basic premise is to offer fun and noncompetitive, if sometimes challenging, runs that traverse all terrain forms from smooth streets or roads, to back alleyways, to rough trails, to the deepest forest and seemingly impassable shiggy. In other words, we'll run just about anyplace, knowing that there is cold beer and good camaraderie before, during, and at the end of the run. SCH4 Hares are "live" about half the time (the thrill IS in the chase and in finding where trail leads!), and otherwise are mostly so.

SCH4 welcome all runners and fitness walkers (this clause is not intended to exclude or cause to feel unwelcome injured/debilitated Hashers) who have good senses of humor, good senses of social and personal responsibility, and good senses of respect for themselves and for others. Anyone who lacks these traits should find another group (Hash or other) that is a better mutual fit, learn to play well with others, or just stay home.

We have settled into a comfortable position as relatively conservative to middle-of-the-road Kennel - by-and-large 'PG13' Hashes, if a "rating" must be offered. Special Events, such as weekend camp-outs or Red Dress Hashes, or private venues may find some half-minds lapsing into 'R' mode (there is a time and a place...), but that is not our normal behavior. To state a few basic tenets...

- . we avoid offending (i.e. respect) property owners and the local citizenry (amuse, yes; offend or appall, no).
- . we avoid offending (i.e. respect) one another.
- . we avoid offending (i.e. respect) our Virgins and Visitors (yes, we want 'em to cum back!).
- . we do not want to be arrested (well, at least I don't want to be arrested).
- . we want to be allowed to return to (if not be welcomed back to) the venues we visit.
- . we wish to preserve our collective and individual integrity.

In other words, we cast our behavior according to our own value sets and by what our social and physical environments define as acceptable.

To this end, we expect each individual Hasher to be self-disciplining - we may be half-minds, but we are also adults. Failing that, Mismanagement and concerned Hashers of SCH4 reserve the right to call attention to and take action to correct recognized "inappropriate behavior" at any SCH4 event - whether on trail, in the Circle, or at the On-After - whether a regular Sin City Hasher, a Visitor, or a Virgin - up to and including expulsion of the offending Hasher(s) from the event. Mismanagement also reserves the right to exclude repeat offenders from future Sin City Hash runs and events.

Occurrence of "inappropriate behavior" is determined based on the above tenets, our philosophy, and the surrounding circumstances, not on a predetermined set of dos and don'ts. We abide by the rules stated at the outset (see nos. 1 & 2, above), and realize that each Hash and On-After venue is unique unto itself.

Finally, we resolutely embrace the 1938 Charter of the Kuala Lumpur Hash House Harriers, the Mother Hash, which states that the purpose of the Hash is

- . to promote physical fitness among our members,
- . to get rid of hangovers,
- . to acquire a good thirst and satisfy it in beer, and
- . to persuade the older members that they are not as old as they feel.

On->ON,

Mismanagement, Sin City Hash House Harriers & Harriettes
